To: Director(s)

Fr: Dr. Tareefe Montaque

I am Dr. Tareefe Montaque a 28-year-old medical graduate from the University of The West Indies (UWI) Mona. I have decided to undertake my **Post Graduate Medical Studies in a US Surgical Residency Program**. This letter is to express my interest in having clinical experience in the USA through your institution. From my research I have gathered that direct clinical experience in the form of Externships augurs well for my future as a US Surgical Resident. I hope to participate in the 2023 Match which begins the summer of 2022.

I have already begun the process of ECFMG certification; having done STEP1 and scoring a modest 231. Currently, I am preparing for my STEP 2 exam and the preparation is going well. I take academia and medical and clinical competence seriously which is evidenced by my past achievements at the UWI where I graduated with a Distinction in Surgery and as the top performing medical student in Jamaica and the Caribbean.

It is my desire to use the wisdom and courage of my mind as well as the strength and vigour of my body in the service of each adult and or child, with whom I encounter. I am naturally a warm, cheerful, and compassionate leader with immense potential. If given the right set of circumstances I know I will be able to make an even greater impact on those around.

This opportunity will serve as a platform to nurture my potential as well as give me the much-needed experience that will be needed to strengthen my application for Surgical Residency in 2022. Any assistance would be much appreciated, and I thank you in advance as I anticipate a favourable response.

I may be contacted at 876-470-7930. Tareefemontaque@yahoo.com or facebook: Tareefe Montaque.

Yours Truly,

Dr. T Montaque
