Florida Department of Health Updates New COVID-19 Cases, Announces Thirty-Four Deaths Related to COVID-19, Evening Update

~27,791 positive cases in Florida residents and 785 positive cases in non-Florida residents~

TALLAHASSEE — To keep Florida residents and visitors safe, informed and aware about the status of the virus, the Florida Department of Health has launched a COVID-19 dashboard that is updated twice daily. Today, as of 6 p.m., there are 28,576 total** Florida cases.

There are currently 324 long-term care facilities with positive cases of COVID-19. The Florida Department of Health has published the list [here](#). The twice daily COVID-19 report also includes information by county about deaths related to staff or residents in long-term care facilities. Of the 2,333 cases of residents or staff in long-term care facilities, 248 have died.

While Florida's testing has increased over the past week, the percent of those testing positive for COVID-19 overall is 10 percent. Of the 14,165 tests performed on April 21, there were 1,384 positive results, or 10 percent.

Thirty-four people have died who tested positive for COVID-19 Broward, Citrus, Clay, Collier, Dade, Hillsborough, Lee, Leon, Orange, Palm Beach, Pinellas, Polk, Seminole and Sumter counties.

New Florida cases include:

- 267 additional positive COVID-19 cases (248 Florida residents and 19 non-Florida residents) reported to the Florida Department of Health.
- There are currently 27,791 positive cases in Florida residents and 785 positive cases in non-Florida residents.

Florida recently partnered with private laboratories around the state to expand COVID-19 laboratory testing capacity. This partnership will increase the number of tests conducted each day and ensure Floridians receive the critical health information they need in a timely manner.

Expansion to private laboratories changes the COVID-19 testing landscape in Florida. Private laboratories are running tests as they receive swab samples from practitioners. Testing and reporting times vary among commercial and DOH laboratories. Demographic information may be updated during investigations. These twice daily reports reflect the state's efforts to accurately and transparently share information.

More information on a case-by-case basis can also be found [here](#).

Confirmed Cases in Florida Residents	27,791
Confirmed by DOH	3,085
Tested by private labs	24,706
