Florida Department of Health Updates New COVID-19 Cases, Announces Thirty-Five Deaths Related to COVID-19, Evening Update

~22,674 positive cases in Florida residents and 666 positive cases in non-Florida residents~

TALLAHASSEE — To keep Florida residents and visitors safe, informed and aware about the status of the virus, the Florida Department of Health has launched a COVID-19 dashboard that will be updated twice daily. The twice daily COVID-19 report now includes information by county about deaths related to staff or residents in long-term care facilities. Of the 1,454 cases of residents or staff in long-term care facilities, 136 have died. We also encourage all Floridians to take the COVID-19 Community Action Survey by visiting www.StrongerThanC19.com.

Today, as of 6 p.m., there are 23,340 total** Florida cases.

While Florida's testing has increased over the past week, the percent of those testing positive for COVID-19 overall is 10 percent. Of the 10,957 tests performed on April 15, there were 1,265 positive results, or 12 percent.

Thirty-five people have died who tested positive for COVID-19 Charlotte, Collier, Dade, Highlands, Indian River, Manatee, Orange, Palm Beach, Polk, Santa Rosa, Seminole, St. Lucie, Suwannee and Volusia counties.

New Florida cases include:

- 443 additional positive COVID-19 cases (439 Florida residents and 4 non-Florida residents) reported to the Florida Department of Health.
- There are currently 22,674 positive cases in Florida residents and 666 positive cases in non-Florida residents.

Florida recently partnered with private laboratories around the state to expand COVID-19 laboratory testing capacity. This partnership will increase the number of tests conducted each day and ensure Floridians receive the critical health information they need in a timely manner.

Expansion to private laboratories changes the COVID-19 testing landscape in Florida. Private laboratories are running tests as they receive swab samples from practitioners. Testing and reporting times vary among commercial and DOH laboratories. Demographic information may be updated during investigations. These twice daily reports reflect the state's efforts to accurately and transparently share information.

More information on a case-by-case basis can also be found [here](#).

Confirmed Cases in Florida Residents	22,674
Confirmed by DOH	2,604
Tested by private labs	20,070
