SHARE INFORMATION

Why get your eggs and milk from Farmers & Artisans? Our farm fresh brown eggs, by the dozen or half dozen, are from Finger Lakes Farms in Ithaca, NY. All their birds are pastured, hormone and antibiotic-free, which means that as well as eating non-GMO corn, soy, and mineral supplements, they forage for bugs, worms, grass, so the eggs are high in nutrients and so flavorful. You'll see and taste the difference.

Ithaca Milk, available in gallons and half gallons, and now quarts, comes from a herd of Jersey cows that are pastured and not treated with any hormones or antibiotics. The whole milk is low-temp pasteurized and non-homogenized, preserving nutrition that is lost with ultra-pasteurization and homogenization. The low-fat milk will continue to be homogenized.

TERMS & CONDITIONS: Milk is delivered on Wednesdays, therefore the milk and egg share pick up runs Wednesday to Tuesday of the following week. Please be advised that if you miss your pick up for your weekly milk share, you will forfeit your milk share for that week. Also, please note that you must bring in your own egg carton weekly to fill. Please do not leave your used egg carton here. We legally cannot reuse old cartons. If you need a new carton, the price is \$.50.
