Introducing Janssen Compass™

Janssen's support program dedicated to patients who have been prescribed either ERLEADA® (apalutamide), DARZALEX® (daratumumab), or DARZALEX FASPRO® (daratumumab and hyaluronidase-fihj).

Program

Janssen Compass™ is a new patient offering with a single point of contact for your patients, helping to clarify their path by providing information, education, and helping them become better advocates for themselves.

Enroll

To enroll, patients, care partners, or healthcare professionals can visit the Janssen Compass™ website, www.janssencompass.com, and fill in the Contact Me form. Or patients can call the program directly at 844-NAV-1234 (844-628-1234) during the operational hours of Monday through Friday, 8:30 AM – 8:30 PM ET.

Support

Patients will connect with a dedicated Care Navigator, with nursing experience, who offers educational support.

Digital and one-on-one support will focus on four educational topics:

Cost and Access

Education on navigating coverage, access, affordability support, and determining eligibility for cost support

Janssen Medication Education

Education on ERLEADA® (apalutamide), DARZALEX® (daratumumab), or DARZALEX FASPRO® (daratumumab and hyaluronidase-fihj)

Self-Coping Skills

Education on coping with stress and anxiety and building a support network

Health and Wellness

Education including goal setting and connecting with support groups

As a participant in the program, your patient
will receive:

Clarity

Resources to help them understand the things that really matter to them—like cost, access, and how to start and stay on their Janssen treatment

Connection

A way to connect one-on-one with a Care Navigator dedicated to guiding support around their needs

Confidence

Ongoing education designed around what to expect as they navigate their Janssen therapy

Janssen Compass™ is limited to education for patients about their Janssen therapy, its administration, and/or their disease. It is intended to supplement a patient's understanding of their therapy and is not intended to provide medical advice, replace a treatment plan from the patient's doctor or nurse, provide case management services, or serve as a reason to prescribe this medication.
