

Advanced Cutaneous Squamous Cell Carcinoma: Immuno-Oncology and the Evolving Landscape of Multidisciplinary Care

Omid Hamid, MD
The Angeles Clinic & Research Institute

Mark Faries, MD
The Angeles Clinic & Research Institute

Wednesday, February 5, 6:30 - 8:30 PT

Participate in an informative discussion on the data regarding the epidemiology of cutaneous squamous cell carcinoma (cSCC) and come away with an understanding of the potential preventative strategies for skin cancer including cutaneous squamous cell carcinoma; modern, multidisciplinary options available for local and regional treatment of this disease; systemic therapy options available for treatment of advanced or metastatic cSCC; and the precautions and potential toxicities of immuno-oncology therapies in cSCC.

*This event is complimentary (dinner to be provided), and seating is limited to the first 50 registrants.
