

# MAYFAIR DIAGNOSTICS REGINA

## FACT SHEET

### Our patients and our community are at the heart of everything we do.

We have been providing community diagnostic X-ray and ultrasound services in Regina since 2011, and publicly-funded MRI services since September 2014.

Mayfair has also been providing private MRI services (in accordance with Saskatchewan legislation) since 2016. All of our Regina clinic employees are local, including the medical director of the clinic who was educated and practices in Saskatchewan.

#### EXPERIENCE AND INNOVATION

Mayfair is owned and operated by over 60 radiologists, more than 40 of whom are licenced to practice in Saskatchewan.

In addition to interpreting general imaging exams, each Mayfair radiologist has a special interest in, or specialized training for, specific imaging areas like neuroradiology, breast, body, cardiac, musculoskeletal, etc. With imaging becoming more sensitive and targeted, specialization helps ensure that images are accurately interpreted by the most qualified radiologist.

Our radiologists have also been helping to improve access and delivery of services to thousands of patients in rural and remote areas for many years by remotely interpreting images for patients across rural Saskatchewan, Alberta, Yukon and Northwest Territory.

#### MAYFAIR DIAGNOSTICS NUMBERS

- Over 24,300 patients have received publicly-funded MRI scans at Mayfair Diagnostics Regina since 2014.
- About 1,500 private MRIs since 2016.
- 2019 – over 11,600 ultrasound patients.
- 2019 – over 7,300 X-ray patients.
- Since 2016, over 200,000 remote interpretations for rural Saskatchewan patients.
- Over 10,000 CT interpretations for St Joseph's Hospital (Estevan) since 2016.
- Rural locations served include Moose Jaw, Swift Current, North Battleford, Weyburn, Estevan, Lloydminster, Regina, and Meadow Lake.
