Project Description

1. Type of plan needed (new startup, business expansion, succession plan, etc.):

2. Business location:

3. Describe the business for which you need a business plan:
Note that to meet the criteria for student developed plans, the business type must normally require a facility, equipment, and employees – consulting companies and most home-based businesses do not meet the criteria.

Would you like more than one group completing the plan (so you can get multiple perspectives)?
