Boston, MA 02133

July 6, 2023

Dear Honorable Conferees:

We, the undersigned, write to you regarding H.3706/S.2406, *An Act to improve the Commonwealth's competitiveness, affordability, and equity*, currently before this conference committee.

We are encouraged by provisions within S.2406, Sections 10-14, amending the Septic System Tax Credit (M.G.L. c. 62, § 6(i)) and request they be included in the Conference Committee's final report. This language reflects more accurately the cost of septic system design and installation today, given the current language was enacted 30 years ago.

As you know, the regions of the state we represent is potentially subject to widespread mandatory septic system and cesspool updates from the Massachusetts Department of Environmental Protection regulations in the coming years. Our constituents are notably concerned on the financial impact these regulations might have and we feel this expansion of the tax credit could assist our communities combat this massive overhaul.

The language we wish to see included makes changes to Chapter 62, Section 6(i):

- Increases the % of design and construction cost for upgrades or replacements of failed

cesspools and other septic systems eligible for the credit from 40% to 60%;

- Deletes the current statute's reference to the 1995 Title 5 regulations and inserts "the State Environmental Code;"
- Increases the maximum system upgrade cost eligible for a rebate from \$15,000 to \$30,000;
- Increases the maximum annual credit from \$1,500 to \$4,000; and
- Increases the maximum amount of credit carryover over a 5-year period from \$6,000 to \$18,000.

We respectfully ask for your consideration of these comments, please contact our office if we can be of any assistance.

Sincerely,

Paul Schmid
