

SURGICAL TECHNICIAN

Interested applicants must meet the income eligibility requirements as specified by the grant program as well as application criteria, which includes a High School or High School Equivalency transcript, TEAS Exam scores, two essays and an interview. Please call Andrea Dunkirk at 631-451-4832 for application information/packet and income eligibility requirements.

SURGICAL TECHNICIAN PROGRAM

No Tuition Required

The goal of the Surgical Technician Program is to graduate qualified students with the knowledge and confidence to function independently and safely in a surgical operating room or similar, sterile environment. Participants must be dedicated to the program to learn all the skills and techniques required to become a Certified Surgical Technologist.

Admission into the 2019 Surgical Technician Program is open to 10 applicants who meet the program criteria and eligibility. This one-year program, beginning on **January 22, 2019**, requires students to attend all classes and labs. In addition, the program will require 120 clinical scrub-ins at an offsite hospital and/or surgical center. Participants will be required to provide their own transportation to and from the clinical site.

The coursework for this program requires a full commitment from the student. Studying, classroom learning, labs and clinical rotations will be very intense and time consuming. This program must be a priority for a successful outcome. It is expected that all assignments will be completed on time and all classes, labs, and rotations will be attended. Surgical Technology is a career that can be very rewarding, however, it requires full dedication. The effort put into this program will directly affect the outcome.

Support for the development/production of this material was provided in part by a grant under the Carl D. Perkins Career and Technical Education Act of 2006 administered by the New York State Education Department.
