

Miranda Kelm worked as an intern in the Department of City Development from June 2016 to May 2017. She became involved with the Sustainable Sheboygan Task Force and worked directly with the Recycling Committee. Because of her passion for sustainability she selflessly volunteered many hours of her time to help with the efforts of improving recycling in the city of Sheboygan.

The Recycling Committee planned on going into all the elementary schools in Sheboygan to educate students on recycling. The goal for this education was to encourage proper recycling throughout the city. Diverting waste from landfill into recycling streams saves city tax payer money.

Miranda developed the presentation that was used to educate the city's elementary school students. She also personally gave the presentation to approximately 3,000 elementary school students through from January 2017 to May 2017. Her cheerful, high energy presentations engaged all the students that attended.
