

For the last several years the Park Department has rented a 125' snorkel lift from United Rentals to service the 232 ball diamond lights located at Wildwood Softball Complex, Sheboygan A's Hardball, and Kiwanis Park diamonds. It takes about a week for the City Electricians to systematically go through the electrical system replacing bad lamps, faulty ballasts, and damaged wiring. When not in use, the City Forestry Division utilizes the lift for trimming trees that cannot be reached by their own lift.

In an effort to keep the Wildwood Softball Complex up to date Mid Lake Softball Association purchased three new LED scoreboards to replace the aged and inefficient scoreboards that are decades old. In a joint effort, the Park Department and City Electrical Department joined forces and completed installing the last of three scoreboards. From the footings on up to include electrical, DPW employees completed the new scoreboards in a timely fashion.
