

"You want to do WHAT?!" Addressing Your Child's Healthy Sexual Development

Accepting people with intellectual or developmental disabilities as sexual beings has been, and is still, a taboo subject. Lack of appropriate education and support is one factor in the high rate of sexual violence and exploitation against this community. As parents and caregivers, promoting your child's positive, healthy sexual development will set the stage for a lifetime of meaningful connections, relationships, self-advocacy and self-esteem! Join us to discuss how to approach the subject, bring your own concerns, and give input on upcoming classes for youth!
