

HONEYMAN SERVICES, LLC

RIDE WITH US!

RIDE SHARE EDUCATION PROGRAM

Designed to teach adults with intellectual and developmental disabilities how to safely access ride share services such as Uber and Lyft to meet their individual transportation needs.

Rideshare Education Program

Transportation is a major obstacle that individuals with intellectual and developmental disabilities face when attempting to access their community independently. Most options available to them have restrictions that do not allow the spontaneous access to activities that many other people enjoy. The ability to access on demand ride share services allows individuals a freedom and path to increased independence.
