

## 2021 Current Trends Symposium on Forensic Toxicology

Registration is now open for the 2021 Current Trends Symposium on Forensic Toxicology (May 31<sup>st</sup> – June 4<sup>th</sup>). Now in its 4th year, this On-line Symposium has gained a reputation for creating a sense of community for forensic practitioners across the globe while disseminating timely and impactful information from recognized experts in their respective discipline – a feat accomplished with no registration fee and no travel costs. Given the hard work and dedicated efforts of this year's Program Chairs – Prof Nikolas P. Lemos (Director, Cameron Forensic Medical Sciences, Barts and The London SMD) and Dr. Karen S. Scott (Director of Forensic Science & Associate Professor, Arcadia University), **the event is free of charge and the content has been deemed appropriate for submission for continuing education credits by the American Board of Forensic Toxicology (ABFT).** Register at <https://www.forensicscienceeducation.org/continuing-education/2021-online-forensic-symposium-current-trends-in-forensic-toxicology/> for both the live event as well as for on-demand viewing of the recorded sessions. Certificates of attendance will be available for both the live and archived events.
