

## ASCLD FRC Communication Approval Request

Topic: Research Executive Summaries

Date: 08/19/2020

Requesting approval for the following:

1. ASCLD Outreach:
  - a. CLM
    - i. The Future Forensics Subcommittee of the ASCLD Forensic Research Committee (FRC) is continuing the publication of brief executive summaries of the recent literature within the forensic sciences. The initial source of the executive summaries is the proceedings of the triannual 19th INTERPOL International Forensic Science Manager's Symposium literature reviews, originally published by INTERPOL. These summaries were written by ASCLD members and are meant to provide a brief overview of the most noteworthy publications and trends in the literature within the last 3 years (2016-2019). The list of seven (7) executive research summaries include reviews in the areas of fingerprints, controlled substances, paint and glass evidence, forensic toxicology, forensic biology, gunshot residue analysis, and firearms and toolmarks. The summaries and additional information about other FRC activities can be found at <https://www.ascld.org/forensic-research-committee/>
  - b. Facebook:
