

# FLUSHMASTER<sup>®</sup> FLUSH PORT REROUTE

*The Safer, Easier Way to Flush Your Outboard*

## Climbing Over Your Transom Sucks. We Fixed That Too.

You asked, we delivered—again. The Flushmaster Flush Port Reroute and Quick Connect Water Fittings are the next evolution in hassle-free engine maintenance. This innovative system relocates your engine's flush ports to a safe, convenient spot inside your boat, so you'll never have to hang over the transom again. Whether you're running a single engine or a quad setup, Reroutes are engineered for accessibility, safety, and simplicity—giving you one less thing to worry about on the water.

### FEATURES & BENEFITS:

**Enhanced Safety** – No more climbing over the transom to connect hoses.

**Quick, Convenient Access** – Flush point connections are just inches apart and located safely inside the boat—not across the transom.

**Marine-Grade Durability** – Built with UV-tested, marine-grade components for long-lasting performance.

**Custom Fit** – Designed for single to quad-engine boats, with added ports for cleaning flexibility and other raw water components.

**Preserve Performance** – Encourages routine flushing to fight corrosion and extend engine life.

**Easy Installation** – Integrates directly into your engine's OEM flush system using high-quality, reliable parts.

**Let's Build Better Boats Together.**

Order yours today and make outboard flushing effortless!

## NEW PRODUCT COLLECTION

We get it—every boat is different. That's why the Flush Port Reroute and Quick Connect Water Fitting collection offers a flexible range of configurations to match your needs. Whether you've got three outboards and want a fourth port for rinsing the deck, or you're just looking for a flush install that complements your boat's design, we've got the right option for you. Choose from white, black, or stainless finishes, and if your setup is unique—we even offer custom boxes built to spec.

### YOUR REROUTE, YOUR WAY

Choose from finishes, layouts, and barb sizes to match your boat and setup:

- Black or white acrylic, or stainless steel
- 1–4 ports, Engraved for vertical or horizontal layouts
- Barb sizes: 1/2" or 3/8"
