

Smart-Growth Zoning Project

Draft Zoning Recommendations Steering Committee and Public Working Session

The Village of Ardsley is preparing zoning amendments to implement the Village's Comprehensive Plan and the DARIS (Downtown Ardsley Revitalization Implementation Strategy).

These efforts have led to the **Village of Ardsley: Smart Growth Zoning Project**, which aims to expand housing choices, attract new developments in the downtown area, and streamline approvals.

The Village has retained the consultant team comprised of KSCJ Consulting and Metropolitan Urban Design Workshop (MUD Workshop) who will host a virtual working session open to the public where they will present the draft zoning recommendations for feedback from the community.
