Beyond the Firewall: Humans, AI and the Future of Trust

From Students to Security Leaders, from AI Innovators to Everyday Users. Together, we'll build the future of trust.

As artificial intelligence rapidly reshapes how we learn, work, communicate, and make decisions, cybersecurity is no longer just about protecting systems and networks. The future of security depends on something even more important: trust. The 5th Annual Cybersecurity Summit explores the intersection of human behavior, emerging technologies, and cybersecurity in an increasingly AI-driven world.

Register for the 2026 Cybersecurity Summit, morning refreshments and lunch are included. **Registration is required.**

Thursday, Nov. 12, 2026

8 a.m.-3:30 p.m.

WMU Student Center, Ballroom A/B
