

The newly opened **Huntsville Lone Star Family Health Center** provides high quality, compassionate and individualized healthcare for individuals and families in Huntsville and Walker County.

CEO Karen Harwell shared, “Unlike most primary care physician offices, Lone Star Family Health Center focuses on serving patients who typically find it difficult to access health care due to lack of insurance, insurance that is not accepted or simply not having the resources to afford cash prices, co-pays or deductibles. We accept Medicaid, CHIP, Medicare and most private insurance, offer affordable self-pay options, and have a sliding fee scale with eligibility. ”

“Our dedicated staff of family doctors and nurses can take care of everyday health needs that include annual checkups, sick visits, child immunizations, sport physicals, limited medical procedures, women’s health, and chronic care management. We also offer an onsite tele-pharmacy and look forward to becoming a valuable medical resource serving the Huntsville community.”

“Leaders in the community, the Lone Star Family Health Center team actively supports community service events such as reduced cost school vaccine drives and health fairs. For more information about Lone Star Family Health Center please contact 936.539.4004 or visit the web site at [www.LoneStarFamily.org](http://www.LoneStarFamily.org). ”
