

# EXCELLENCE IN HEALTHCARE

Authorised  
Enterprise Reseller

Computacenter

**Zerto**

**DATRIX**  
Extreme  
networks

**FUJITSU**

**PURESTORAGE**

 arcus global

**8x8**

**EPSON**  
EXCEED YOUR VISION

**StarLeaf** 

Excellence In Healthcare brings together senior leaders from across Health and Social Care to network with each other and discuss the current hot topics including:

- Busting Myths
- GDE Site Updates
- Digital Transformation
- Plugging the nursing gap
- Electronic Patient Records
- Technological implementation
- Collaborative Working - Beyond STP's
- Reducing Hospital Admissions - Being proactive rather than reactive

Attendees will be able to share their own experiences and the challenges they are currently facing. In addition, you will then have the opportunity to look at different ways of addressing these problems and an overall look at where we were, where we are and what needs to be done.

---

## Wednesday 19th June

**15:00 - 18:00**

**Hotel Check-in and Free Time**

**19:00 - 20:30**

**Registration and Drinks Reception**

**20:30 - 22:00**

**Networking Dinner**

---

## Thursday 20th June

**07:40 - 08:20**

**Registration, Tea, Coffee and Pastries**

**08:20 - 08:30**

**Chair's Welcome and Opening Remarks**

---

---

**08:30 - 09:00**

**Using Technology to Enable Transformation**

**England**

Diane Baynham, Head of Digital Transformation

---

**09:00 - 09:30**

**Care in the Home, Care in the Hospital**

Computacenter and Apple enable healthcare organisations to drive efficiency, productivity and innovation by providing services, solutions and technology that are helping to drive better personal experiences whether as a care giver or recipient of care. Join us for a briefing to learn how apps on iPhone, iPad and Apple Watch are re-imagining healthcare delivery around the world for medical staff, care givers and patients, both in the hospital and the home. Find out how leading institutions have achieved meaningful impact inside the hospital using Apple technology and learn how iOS devices and apps can help you develop an engaging care-at-home program.

Join us for a briefing to learn how Apple and Computacenter are enabling healthcare organisations to deliver safe, secure, innovative and transformative high quality clinical services. Find out how leading institutions have achieved meaningful impact inside the hospital using Apple technology, and learn how iOS devices and apps can help you develop an engaging care-at-home programme.

Ashley Richardson, End User Chief Technology Officer

Dominic Kenny, Healthcare Industry Lead UK/I

11:20 - 11:50

**OPTION 1**

**Why IT Resilience is Imperative for Digital Transformation**

**Zerto**

IT resilience is the ability to seamlessly adapt to change while protecting your business from disruptions. An IT resilient mode of operations allows you to be ready for any type of disruption, planned or unplanned, so you can mitigate the risk of downtime and focus on the projects that drive transformation.

Hear how Zerto's IT resilience strategy combines continuous availability, workload mobility, and multi-cloud agility to ensure your organisation would be able to withstand any disruption whilst leveraging new technologies seamlessly and moving forward with confidence.

Luke Cater, Systems Engineer

11:20 - 11:50

**OPTION 2**

**Supporting Hospitals Digital Connectivity**

**DATRIX**

**Extreme**  
networks

Modern Digital Transformation strategies are hugely reliant on maximizing the benefits from an underlying, agile and intelligent network infrastructure. With the increasing demands on often fragile, complicated and aging network infrastructures, due to the plethora of end user devices, intelligent IoT systems and technological innovation across the NHS, this infrastructure is now key in ensuring that core projects and initiatives are delivered in an intelligent manner, not only from an application perspective, but also from the ability to understand what is happening across the estate and beyond into outsourced and cloud based environments and most importantly in real-time.

To ensure that projects are deployed on time, in budget and importantly achieve the key deliverables it is more vital than ever to ensure that the right investment is made within this critical business assets, as otherwise failure is just around the corner. Join Extreme Networks to understand how to build your infrastructure environment to support your Digital connectivity programs and make a success of your associated digital transformation projects.

Jaspal Singh Virdee, Consulting Systems Engineer – Extreme Networks

12:30 - 13:00

**OPTION 1**

**Digital Transformation and the Modern Workplace**

Join us in this session where we will explore how the current workplace is transforming, what the drivers are towards more digital ways of working and how in turn you can reduce the reliance on paper based processes.

We will explore the benefits available to organisations that implement a digital strategy and how Fujitsu scanning solutions can play a part in this journey.

12:30 - 13:00

**OPTION 2**

**The Pure Storage Data Centric Architecture for Healthcare Providers**

Discover how Pure Storage has used all flash technology to bring disruption to storage land, creating a superior operational and financial model built around data, enabling healthcare providers to import new cloud-like efficiencies into their datacenter, built faster better services, focus on innovation and gather new insights from their data. At the heart of it all is the Pure Storage Data Centric Architecture, now widely used in the global healthcare space and entitled with the highest customer satisfaction score in the storage industry.

**Yves Mahieu**, EMEA Director Healthcare & Life Sciences

---

13:00 - 13:45

**Lunch**

---

13:45 - 14:00

**Tea & Coffee Break and Networking Meetings**

**PLEASE CHECK THE SCHEDULE ON THE BACK OF YOUR  
BADGE AND ENSURE THAT YOU ATTEND YOUR  
MEETINGS WHICH WILL TAKE PLACE IN THE BAR AREA**

---

14:00 - 14:30

**Collaborative Technology Implementation**

Areas to be covered include:

Data Management

Delivery of the Integrated Care System (ICS)

Interoperability across provider organisations

Realising the true benefits of technology and information beyond the obvious

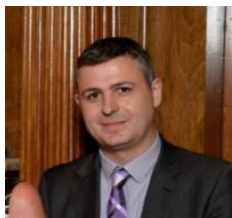

**Simon Marsh**, Chief Information Officer

---

---

**14:30 - 15:00**

**Data Driven Digital Transformation – A Pragmatic Approach**

Dorset County Hospital NHS Foundation Trust

Dorset County Hospital NHS Foundation Trust has been developing an ambitious information strategy that underpins our Digital Transformation agenda. Our vision is to put good quality data at the heart of every transformation and quality improvement initiative. In Dorset County Hospital we are developing a learning culture where clinical and operational teams will be able to collaborate to reshape and improve our clinical services using data and technology. This presentation will cover the theoretical framework behind the strategy, our achievements so far, the key lessons learned and the next steps of our journey.

**Ioannis Kotsiopoulos, Head of Business Intelligence**

---

**15:00 - 15:30**

**OPTION 1**

**Intelligent Voice Automation to Reduce Staff Workloads and Improve Patient Experience**

Find out how the technologies which power the Amazon Alexa can be used via the phone to improve automated interactions with customers and patients 24x7, whilst reducing staff workloads.

**Gary Beddow, Business Development Director**

---

**15:00 - 15:30**

**OPTION 2**

**Clinical Collaboration of the Future**

NHS organisations face significant challenges over the coming years. Demand for healthcare is growing, costs are escalating, and patients have complex needs with increasing expectations. Effective and secure communications and collaboration are key to increasing productivity and reducing costs across health and social care systems.

8x8 Public Sector specialist Chris Bayliss will explore how data-driven insights can digitally transform an organisation by reducing costs and maximising patient experiences:

- How integrated communication channels can accelerate patient interactions?
- How replacing legacy systems can add value, reduce costs and reduce complexity?
- Why secure clinical collaboration tools are key to enabling the workforce of the future?
- Practical ways to enhance patient service outcomes using Artificial Intelligence.
- Avoiding the common pitfalls of moving to cloud communications.

**Chris Bayliss, Public Sector Sales Executive**

MEETINGS WHICH WILL TAKE PLACE IN THE BAR AREA

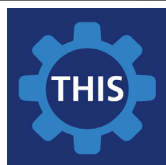

---

16:15 - 16:45

**EPR Implementation - You need Digital Transformation first!**

Calderdale and Huddersfield NHS Foundation Trust along with Bradford Teaching Hospitals NHS Foundation Trust have an EPR system which is being hailed as the most successful in Europe.

However, rather than looking at the EPR system on its own the HIS and both trusts looked at what else needed to be in place in order to deliver the programme which triggered an organisational wide Digital Transformation project. Mandy will talk about the journey taken including infrastructure, outside collaboration and much more.

Mandy Griffin, Managing Director

---

16:45 - 16:55

**Chair's Closing Remarks and Event Finish**

---
