**To: All AccuLoad® Users**

**RE: AccuLoad® III Support**

Dear Valued Customer,

To follow up on the communication sent in January of last year, as anticipated we have exhausted our supply of lifetime buy components for AccuLoad III. Therefore, at this time we must announce that **TechnipFMC is no longer able to supply any new AccuLoad III replacement electronic circuit boards**. This includes the KDC.NET, EAAI, BSE, and AICB\* boards.

For a limited time, we are still offering a core credit when returning working AccuLoad III boards in conjunction with an AccuLoad III-to-IV upgrade.

We will also strive to continue offering refurbished AccuLoad III boards for a period; however, supply is contingent upon incoming workable core boards we receive, and there is no guarantee of availability of these refurbished boards now or in the future.

I look forward to continuing to serve you with our AccuLoad IV generation of presets.

Regards,

James M. Pettinato, Jr.  
Electronics Product Manager  
TechnipFMC Measurement and Production Systems

*\*Note that the AccuLoad IV A4I board is suitable as a drop-in replacement for the AICB board if needed.*
