

# Wearing a Mask

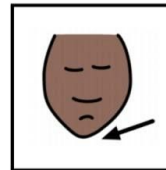

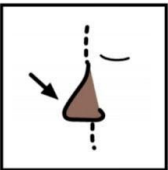

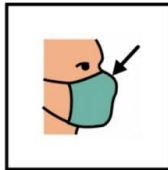

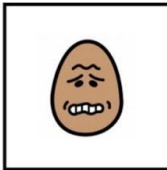

www.theautismhelper.com

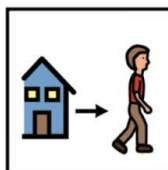

Because of coronavirus, I need to wear a mask when I go out into the community.

Masks help keep everyone safe and healthy. Masks make it so germs don't spread as easily.

It may feel weird or uncomfortable to wear a mask at first. The mask should cover your nose, mouth, and chin.

Wash your hands before putting on your mask. Make sure to wear your mask whenever you leave your house.
