

# Wearing Masks

Germs can make us sick. They are too small to see, but we might carry them inside our bodies.

You can spread germs even if you feel healthy, so wearing masks keeps others safe from germs we may have.

Masks are part of any super-healthy superhero's outfit!

Wear masks when it's hard to stay a safe distance from others you don't live with.

Wearing masks is a great way to show we care about others.
