

Post-Conference Course

The Navigator Puzzle: Navigation Piece by Piece

Melissa Hopkins, RN, BA, CNBN & Eleanor Broaddus, RN, CN-BN, CBEC, BSEC

A Navigator is one of the most unique professionals that intertwine with patients and their families on multiple levels and in all domains of personal, imaging and breast cancer care. This is a truly strong statement for your value as a Navigator entrusted with the flow of patient care. Every year NCBC offers Navigation courses as requested by the Navigators to update knowledge, skills and information in your comprehensive work with patients. A strong base understanding of barriers and ways to eliminate those barriers to care are essential. This year, 2018, NCBC is proud to bring you lectures from the experts in care such as:

- See how Navigators mesh with other professionals in the Tumor Board
- Mechanisms of Lymphedema
- Talking with Children
- In depth information on Mastalgia
- Navigator to Navigator Real Case Studies Panel with attendee interaction
- Pieces to the Puzzle Navigator post conference
- And many other conference offerings that tailor to your unique practice

Navigation is an ever-evolving field that requires a broad and deep understanding of the patient's pathway to survivorship and even end-of-life- care. You will emerge stronger, better connected and ready for strengthening or re-energizing your current program.

We look forward to seeing you there!

Tuesday, March 13

7:00 - 7:45 am	Breakfast Symposia with Myriad
