Judy Roberson, a retired Army Nurse has been homebound for the past two years due to many health problems. She is able to go to her medical appointments with the help of **Dave Baltes, a Middleton RSVP driver**. “He’s wonderful,” Roberson said. “I have a lot of pain and can’t stand or sit upright for any length of time, but we have a system to get me in his car using a step stool that works really well,” Baltes is clear about why he became a volunteer driver. “Driving gives me a reason to get going in the morning,” he said. “Plus I’ve met some really nice people with interesting stories, many who live alone and have no one else and I get the benefit of helping them.”

Baltes has devoted years as a volunteer to various organizations.

It’s clear he knows how to keep himself in the game and it’s lovely that he offers people like Roberson the same opportunity. **Volunteers do make a real difference.**
