The Peer Support Expansion Initiative program consists of students taking the CPS Core Training, followed by approximately 100 hours of Enhanced Trainings and a supervised Field Placement. The program prepares individuals to obtain the CPS credential and provides support with job readiness and employment opportunities. Certified Peer Specialists are people in recovery from a mental illness who want to use their experience to help others. They work hard to assist individuals with their own recovery journey.

Program Breakdown:

- Core Training: 75 Class Hours
- Enhanced Trainings with Field Placements: Approximately 100 Hours
