This guide includes vendors providing tools and services in the Social Determinants of Health (SDOH) market. CHCANYS developed this guide using information submitted by eligible vendors in response to a Request for Information. The information in this guide is subject to change, and is not a comprehensive list of all SDOH vendors in the market. Our aim for this guide is to provide helpful information for FQHCs making decisions about which SDOH tools best fit their needs.

* Integrated with some EHRs including Next Gen, Epic, Intergy, GE Centricity & Azara DRVS

Cost

Initial: CareMessage charges health centers a one-time implementation fee for implementation.

Ongoing: Ongoing costs include the annual subscription fee for the CareMessage platform. Interfaces and integrations with EHRs and Population Health Management solutions may collect additional one-time fees and annual maintenance fees, all of which are shared with interested health centers with transparency.

Total: CareMessage prices are based on a health center’s total patient population.

aepstein@chcanys.org
InquisitHealth Inc.

SDOH Focus: Chronic disease mentoring with focus on identifying and addressing any underlying SDoH barriers. Program coordinates with patient's PCP, health plan, and local CBOs.

Product Description: 1-to-1, peer-to-peer mentoring for patients with diabetes, asthma, pre-diabetes, sickle cell, hypertension, or chronic kidney disease. Coaching is remote via telephone and smartphone; delivered 1-to-1 through trained peer mentors (ie, type of community health worker). Program is customized to each patient's needs. Objective is to extend the reach of your existing staff and improve clinical outcomes.

NowPow

SDOH Focus: Increase access to social services and community resources.

Product Description: NowPow provides a personalized community referral platform that supports whole-person care/SDOH initiatives and strengthens partnerships with community-based organizations. NowPow’s referrals use evidence-based condition algorithms to match people to optimal services so everyone can stay well, meet basic needs, manage with illness, and care for others. Referrals can be tracked and coordinated to provide deep community resource and referral insights.

CHCANY'S VENDOR GUIDE

Pieces
Pieces Community Connect

SDOH Focus: Pieces Community Connect is a care management and closed-loop referral solution.

Product Description: Pieces Community Connect features a sharing framework that allows disparate organizations to share consented levels of patient information so that all people caring for an individual can be armed with the right information, at the right time. It enables multiple sectors to collaborate on a care plan, provide input on the patient’s latest requirement, and allows for closed-loop referrals through a native referral directory. User-based roles with different permission levels and program authorizations are leveraged to ensure that patient data is shared on a ‘need-to-know’ basis.

Ride Health

SDOH Focus: Ride Health partners with healthcare organizations and transportation providers to strengthen enterprise transportation programs and drive intelligent transitions of care.

Product Description: Ride Health’s web-based transportation coordination platform uses technology and data with a human approach to solve some of the biggest transportation challenges that care coordinators, providers, and payers face. The platform maps out each patient’s unique needs and preferences for the best ride experience across clinical and social needs, ensuring greater access, improved efficiencies, lower costs, and better outcomes.
