Join Your Regional Hepatitis C Elimination Coalition

The New York State Regional Hepatitis C Coalitions bring together organizations and partners working across each region to strengthen collaboration, share expertise and resources, identify regional needs and opportunities, educate policymakers, and advance coordinated efforts toward hepatitis C elimination in New York State

Coalitions are an exciting opportunity to connect with partners in your community, bring your program's experience and perspective to the table, and help shape hepatitis C elimination efforts in your region.

Reach out to the Coalition Coordinator in your region to learn more and get involved!
