

Individual has COVID-19 Symptoms and is NOT a close contact to a COVID-19 positive person or COVID-19 symptomatic person.

Test Result:	Intervention: (Isolation OR Quarantine)
Negative: PCR Test	Stay in isolation until no symptoms for at least 24 hours <u>and</u> a doctor's note allowing return to school/work.
Positive:	Stay in isolation for at least 10 days since the onset of symptoms and until at least 24 hours have passed with no fever (no fever-reducing meds) and improved symptoms.
Not Tested:	Stay in isolation for at least 10 days since the onset of symptoms and until at least 24 hours have passed with no fever (no fever-reducing meds) and improved symptoms. *Can return to school earlier if obtains a note from healthcare provider with alternate diagnosis.

Individual does not have COVID-19 Symptoms and is NOT a close contact to a COVID-19 positive person or probable COVID-19 person.

Test Result:	Intervention: (Isolation OR Quarantine)
Negative:	No interventions.
Positive:	Stay in isolation for at least 10 days since the onset of symptoms and until at least 24 hours have passed with no fever (no fever-reducing meds) and improved symptoms.
Not Tested:	No interventions.

Individual has COVID-19 Symptoms and is a close contact with a COVID-19 positive person or COVID-19 symptomatic person.

Test Result:	Intervention: (Isolation OR Quarantine)
Negative:	Isolate for at least 10 days since onset of symptoms and until at least 24 hours have passed with no fever (no fever-reducing meds) and improved symptoms.
Positive:	Stay in isolation for at least 10 days since the onset of symptoms and until at least 24 hours have passed with no fever (no fever-reducing meds) and improved symptoms.
Not Tested:	Isolate for at least 10 days since onset of symptoms and until at least 24 hours have passed with no fever (no fever-reducing meds) and improved symptoms.

Individual does not have COVID-19 Symptoms but IS a close contact to a COVID-19 positive person or COVID-19 symptomatic person.

Test Result:	Intervention: (Isolation OR Quarantine)
Negative:	Quarantine for at least 14 days from date of last exposure with COVID-19 positive infectious person.
Positive:	Stay in isolation for at least 10 days since date tested positive or onset of symptoms and until at least 24 hours have passed with no fever (no fever-reducing meds) and improved symptoms.
Not Tested:	Quarantine for at least 14 days from date of last exposure with COVID-19 positive infectious person.

Wearing a mask does not change the 14 day quarantine requirement. A "close contact" is a person who has not tested positive with COVID-19 within the past 90 days and comes in close contact (within 6 feet for at least 15 mins) with a person who has recently tested positive or is presumed positive (has specific symptoms) for COVID-19 and is during their infectious period (that we determine). Probable COVID-19 means a person who has not had COVID-19 in the past 90 days and is experiencing COVID-19 symptoms, but has not been tested or is pending testing results.
