Wyoming's Rib and Chop House • Cheyenne, Wyoming
Please RSVP

Saturday, April 4, 2026

Coffee and Donuts • 9:00 am
Leachman \$Profit Center

Chuckwagon Lunch • 12:00 noon
Leachman \$Profit Center

Herdbuilder Sale • 1:00 pm MDT
Leachman \$Profit Center

PAYMENTS

Please overnight checks to:

Ludvigson Stock Farms
15 Avanta Way, Suite 1
Billings, Montana 59102

Any invoices not settled within
7 days from the sale will not
receive free shipping or the first
season breeding guarantee.

RETAINED INTEREST

We are selling a 1/2 interest and full possession in every bull in the sale. This gives us the right to collect semen at our expense and at the convenience of the new owner. The new owner receives the full salvage value of the bull. If anyone has any questions in regard to this please feel free to contact us.

Seedstock Producers please contact Ludvigson Stock Farms to request a copy of our semen collection and marketing agreement.

Videos will be available on both sites as well as at ludvigsonstockfarms.com

All Bull Performance Information, Ultrasound, Scrotals and Frame Scores are available on our website at www.ludvigsonstockfarms.com.

Top \$ Angus Eligible is a premium program available through the RAAA to identify sires and calves that rank in the top 25% of the breed for the Gridmaster Index. There is a large pool of feedlot owners that have signed up to source these cattle for their operations.

EARLY INSPECTIONS: All highly culled and inspected Red Angus influenced bulls are available for viewing at any time. The bulls will be put into place at the sale site on Saturday prior to the sale. For anyone wanting to see the cattle prior to Saturday please call in advance.

EARLY ARRIVALS: We welcome everyone to arrive the day before the sale to study the bulls selling as well as our program. Also it will give us time to discuss your program goals and objectives.

LODGING/ACCOMODATIONS: There are several lodging options in the area and following is a list of our suggestions:

Little America Hotel and Resort
2800 West Lincolnway - Cheyenne, Wyoming (307) 775 - 8400

Holiday Inn Express - Torrington
1700 East Valley Road - Torrington, Wyoming (307) 532 - 7600

Holiday Inn Express - Scottsbluff
1821 Frontage Road - Scottsbluff, Nebraska (308) 632 - 1000

AIRLINES: Cheyenne is served by United Airlines and Denver International Airport is only 1 1/2 hours by car.

HOSPITALITY/FOOD: Sale hospitality will be provided the day of the sale including coffee and rolls in the morning and lunch served at noon.

SALE LOCATION: The sale is located at the Leachman \$Profit Center in Meriden, Wyoming.
3847 Road 152, Meriden, Wyoming 82081

TRUCKING: We provide for all trucking of animals after the sale, unless the buyer wishes to pick animals up after the sale. All bulls selling in this event for \$6,000 or more or any invoices with totals of \$30,000 or more will be delivered for free to the nearest central points. All other bulls will be delivered at cost (\$0.75/mile) to the nearest central points. All females will be delivered at cost to the nearest central points. We will begin delivering after the sale.

SALE ORDER: Cattle sell in catalog order for your convenience.

SIGHT UNSEEN PURCHASES (SUS): We encourage everyone to attend the sale but we understand that not everyone can be with us sale day. We offer a 100% Satisfaction Guaranteed Sight Unseen Purchase program through our seasoned and professional marketing representatives. Please feel free to contact any of our representatives on the inside front cover for your buying needs.

Individual Performance

ProS	ProS Index - combines HB Index and GM Index into one Index
HB	Herdbuilder Index - ranks bulls on the cow herd building traits
GM	Gridmaster Index - ranks bulls on the feedlot and carcass traits
CED	Calving Ease Direct-percent difference of calves unassisted at birth
BW	Birth Weight
WW	Weaning Weight
YW	Yearling Weight
ADG	Average Daily Gain
DMI	Dry Matter Intake
MILK	Milk
ME	Mature Cow Maintenance Energy Requirements
HPG	Heifer Pregnancy-percent difference daughters conceiving
CEM	Calving Ease Total Maternal-percent of difference of daughters calving unassisted
STAY	Stayability-percent difference of daughters staying in a herd until six years of age.
MARB	Marbling
YG	Yield Grade - predicts differences in USDA Yield Grade score and is expressed in USDA Yield Grade units.
CW	Carcass Weight - predicts differences in hot carcass weight and is expressed in pounds.
REA	Rib Eye Area
FAT	12th rib fat thickness
F:G	Feed to Gain - Lower number is better
INTAKE	Feed Intake - Lower number is better
DISP	Disposition score from 1 Star to 5 Stars - 3 Stars is average and 5 Stars is the best and 1 Star is the worst

\$PROFIT - \$RANCH - FERT

The higher the number the better for each index. The % breed rank for each index is listed to the right of the of the index.

GeneSeek Genomic Profiler™ (GGP-LD)
the EPD's have been enhanced to have increased accuracy

FERTILITY: All of the bulls are fertility tested and sell as Guaranteed Breeders.

Leachman \$Profit Center

GENETIC TESTING:

All necessary genetic testing has been carried out as prescribed by the Red Angus Association of America. No tested carriers are selling in this event.

Welcome to the Ludvigson Stock Farms 20th Annual Spring Herdbuilder Bull Sale

We are excited to welcome you to our 20th Annual Spring Herdbuilder Bull Sale — hosted at the Leachman \$Profit Center in Meriden, Wyoming. This location represents an exciting step forward for our program. The Leachman facility is one of the most advanced performance testing and feed efficiency centers in the country, allowing us to test our bulls in a state-of-the-art environment. The central location in Meriden also provides excellent access for our customers across the United States, with improved transportation and delivery options. Most importantly, it allows us to continue offering the same full-service guarantee while leveraging one of the most proven and data-driven systems in the industry.

This year's sale offering is one of the best sets of Red Angus and Red SimAngus bulls we have ever produced. The group is especially strong in structure, with outstanding feet, legs, and soundness. From top to bottom, the bulls are uniform, balanced, and built for long-term performance. In addition we have many outcross pedigree bulls that offer fresh and cutting edge genetics.

We believe the beef industry is entering one of the most dynamic and competitive eras in history. As national cow numbers rebuild, feed-lots and packers are becoming increasingly selective in the genetics they source. Cow-calf producers who raise high-quality, highly efficient feeder cattle will be the ones who see their calves sought after — and even fought over — in the marketplace. Genetics and sound herd health programs will be essential to capturing these premiums. With all-time highs in the beef market and strong fundamentals pointing to sustained profitability for years to come, there has never been a better time to focus on superior genetics.

Over the years, we have developed and refined a multi-trait selection model that optimizes calving ease, growth, maternal, and carcass performance. Our goal is to help our customers increase overall profitability through balanced, efficient, and proven genetics. We continue to contribute performance data to Lee Leachman's patented \$Profitability model and database, one of the most sophisticated systems in the industry.

We also encourage you to visit with us about marketing your calves for next year. Our commercial marketing arm, Orion Beef Group, operates a state-of-the-art marketing platform at www.orionbeefgroup.com, providing opportunities to connect superior genetics with high-value buyers. We are actively purchasing replacement heifers and plan to continue doing so.

If we can help you with travel or accommodations, please contact us. Sale headquarters this year will be at the Little America Resort and Hotel in Cheyenne, Wyoming. As always, we appreciate your continued support and friendship, and we look forward to seeing you at the sale.

Sincerely,

Ryan Ludvigson

Building Red Angus Influenced Genetics that are the most \$Profitable in the Breed and Beef Industry Today!

Our Program

Ludvigson Stock Farms is a family operation established in 1954. Our roots are based in the commercial cow calf and cattle feeding sectors. We understand what is needed to be successful in these areas and it has shaped our breeding philosophies in the genetics that we produce.

Our Ranches

The Elite Nucleus herd runs on our "home" ranch which is also our advanced genetics center located in Iowa where our parents began farming over 70 years ago. This ranch has served as our donor and embryo transfer facility since 1980.

Our Genetics

We have established a breeding philosophy that incorporates optimizing multiple traits without over emphasizing any single trait. Our foundation herdsires Expectation, Packer, Big Sky, Night Calver and Saga are perfect examples that balance all traits and produce least cost cattle with exceptional phenotypes.

Our next generation of herd sires such as Commander, Identity, Prime Plus, Call of Duty and Exactly continue this tradition and headline the bulls that we will be selling in this event.

Our Bull and Heifer Development

We develop our bulls and females at various development centers throughout the United States. All the bulls are fed a high roughage ration designed to produce a 3.0 lb ADG with 0.2 of an inch back fat. The replacement females are fed a carrying ration and we have maintained over an 80% first service AI conception rate on our females. The cattle are developed to adapt to any environment and thrive.

Our Team

The LSF team includes not only our family but our managers, cooperators and customers. It takes a team to remain competitive in the industry today and we value the input from all of our team members.

Our Key Members:

• Ryan Ludvigson – is our main marketing representative and oversees the cowherd and development operations in Montana.

• Justin Beeson – is our donor herd manager, managing our embryo collection and transfer program as well as our embryo export program.

• Cody Matheson – is our main bull and heifer development manager – oversees all the bulls, replacement females and commercial bred heifers.

• Jordan Aller – is our data manager and cooperator coordinator for our performance program.

Our Customers

Our customers play an integral and ongoing part in our breeding program. It would be impossible for us to remain competitive without constant input by our customers. Our customer's environments range from the High Desert to the High Plains and from the Midwest to the Rio Grande. Adaptability of our genetics has been the key to why our customers come back year after year.

\$Profitability

Again this year, every bull will have a \$Profit Index. This index ranks cattle on their ability to return "profit" to the beef industry. We believe that this index will simplify the selection process for our customers and move their operations in the right direction faster in this competitive market. Please contact us to visit about this ground breaking index as well as to receive materials that explain the process in more detail.

Founders
Lars and Joan Ludvigson

Ludvigson Stock Farms was founded by Lars and Joan Ludvigson in the early 1950's in Cushing, Iowa. Originally the operation was formed as a conventional farming business which included row crops of corn and soybeans, hay, a farrow to finish swine operation and a cattle feeding enterprise. The cattle feeding enterprise garnered attention by topping the Chicago International Market during the height of its run in the 1950's and 1960's.

A commercial Angus cowherd was added to LSF in the 1970's. Lars and son, Park, spent several summers in Montana in the early 1980's selecting club calves and they recognized the increased productivity of crossbreeding Angus cows with continental bulls. LSF implemented a crossbreeding system and began to produce club calves which were sold in annual sale during the late 1970's and early 1980's. Lars and Park were very impressed with the growth of their Simmental calves and began to gravitate to breeding up their Simmental F1's.

LSF moved into the seed stock business in the early 1980's producing Registered Simmental bulls and females. LSF hosted annual female and bull sales throughout the late 1980's and early 1990's. During this time Lars and Joan were active leaders in the local, state and national Simmental and Cattle-men's organizations serving as directors and committee members. LSF was a well known prefix in the Simmental breed during this time and can be found in the pedigrees of many bulls in AI studs during that time.

RED ANGUS BEGINNING

Lars and Park took a trip in the summer of 1992 that would shape the future of Ludvigson Stock Farms forever. Park had become interested in Red Angus cattle in the year prior through discussions with friends in the cattle feeding industry. Park researched the breed thoroughly and selected several breeders to visit to evaluate the qualities of the Red Angus breed. The trip proved to be exciting for both Lars and Park and in the fall of 1992, Park purchased 10 females from Panhandle Red Angus and Redland Red Angus as a test group.

This "test" turned into an immediate approval of the breed through calf vigor, survivability, milking ability of the cows, body condition scores, time-liness of breed back and pounds at weaning time. Saying everyone at LSF was more than excited about Red Angus is an understatement. LSF would go on to add genetics from Panhandle, Redland, Buffalo Creek Red Angus and Sodak Angus Ranch.

THE LEACHMAN CATTLE COMPANY YEARS

LSF made the decision that to correctly evaluate the bull progeny produced

in the operation, the bulls would be performance tested in large Red Angus genetic pools. LSF contributed bulls to the Leachman Cattle Company program from 1996 to 2002 with an amazing run of all LSF bulls selling for an average of over \$4,700. In the second year with Leachman's, LSF produced the lot 1 and lot 2 bulls in the world's largest bull sale. Lot 1, Leachman Pol Position 1358F sold for \$20,000 and Lot 2, Leachman Meat & Cheese 1367F both bulls were out of a mother/daughter combo LSF Della D109 and LSF Crystal C09. These two females would be the foundation for our herd and their influence today is still found in the most productive females in our herd.

In addition, to these top selling bulls, LSF would go on to produce the high selling bull in 1998, LCC Bullseye 1379G at \$67,000 along with what Jim Leachman would say was one of the best flushes of embryo bulls he had ever seen. The flush brothers of LCHMN Sir Lancelot 1357G (\$20,000), LCHMN Cowboy Up 1359G (\$13,000), LCHMN Robbin the Rich 1389G (\$12,000) and LCHMN Shiny Hood 1360G (\$10,000) who would go on to be named the National Champion Red Angus bull in 1998. Also that year LSF sold the \$35,000 Leachman End Cut 1383G.

One of the best sets of Red Angus herd bulls ever assembled that year.

The other herd bulls selling over the years at Leachman's included LCC Sharpshooter 1369H (\$42,000), LCHMN Enterprise 1370H (\$12,000), LCHMN Vaquero 1412J (\$19,000), LCC Market Place 1270K (\$13,000) and LCC The General A501L (\$30,000).

Leachman Cattle Company had a great effect on LSF through the education of the Red Angus breed and the approach that the company took to evaluating sires and to develop breeding programs. Ryan was the head of marketing for Leachman Cattle Company from 1997 to 2000. The Ludvigson and Leachman families continue to have a close relationship to this day and still exchange thoughts as well as collaborate on breeding evaluations and strategies. It is an understatement to say that the LCC years had a profound effect on the development and success of LSF.

THE MIDWEST YEARS

LSF began its inaugural Focus on Females Sale in September 2000 held at the main headquarters in Cushing, Iowa. This elite female offering was the largest Red Angus female sale in the country at that time. This event would be carried on every fall until 2008 when LSF began its expansion in the west. All females have been retained since then to fuel the large expansion that LSF has went through during the last years.

LSF made another significant decision in the fall of 2002 to begin testing and marketing bulls with Neo-Sho Farms in Southwest City, Missouri. The move was made to enhance the strong customer base that LSF was developing in the Midwest and to bolster Neo-Sho's current customer base. LSF topped the event in 2003 with the sale of LSF Combination A301M for \$46,000 to ABS, Bieber, Paul, Sonstegaard and Jinglebob. The next year LSF once again topped the event with the sale of LSF Canyon Classic 3037N for \$20,000 to Wood Red Angus in Oklahoma.

Ludvigson Stock Farms began holding its own bull sales in 2007 at the Iowa Headquarters but for only 2 years. The 2007 sale featured the \$18,000 LSF JBOB Expectation 6034S that was one of the high marbling bulls in the breed at the time and a bull to this day that is one of the high marbling bulls in the breed. The 2008 sale featured the \$17,000 LSF Tank 7005T and the \$16,000 LSF Venture 7062T.

THE MONTANA MOVE

In the fall of 2008, Ludvigson Stock Farms made the decision to move its bull sale west to Park City, Montana. We held bull sales in Park City from the spring of 2009 until the spring of 2013. Ludvigson Stock Farms continued to grow over those years and outgrew the development facility in Park City and moved in the summer of 2013 to the Weschenfelder Development Facility in Shepherd, Montana which provided the needed size for its growing expansion. The Weschenfelder facility is still today the home of Ludvigson Stock Farms development center for its bulls and replacement females along with its Montana sales center.

A year after the bull sale was moved west, LSF moved part of the cowherd to Montana and began to run cows in Stillwater County in Montana. In 2010, the majority of the cowherd was moved to Montana with only the donor cowherd left in Iowa. The cowherd was run for 4 years just south of Columbus, Montana in the beautiful Yellowstone River valley.

In the fall of 2013, LSF merged its Red Angus herd with Steve and Shelley Newberry's Strawberry Ridge Reds herd to form LN Cattle Company. LSF was experiencing an accelerated demand for its genetics and the opportunity to merge allowed LSF to better service its growing customer base. LN Cattle Company purchased a ranch just south of Lewistown, Montana and is the home to the elite nucleus herd. LN Cattle Company supplies the majority of genetics for Ludvigson Stock Farms.

National Expansion

LSF markets bulls throughout the U.S. and has one of the most geographically diverse customer bases in the beef seedstock industry. Wanting to better serve this diverse base, LSF began developing regional sales to better serve locales throughout the U.S. The first regional sale was held in Dia-

mond, Missouri in March 2014. LSF added another sale in Mandan, North Dakota in February 2015 and another in Madras, Oregon in March 2016. LSF added additional regional sales in Buffalo, Texas and Visalia, California.

Brand Name

Ludvigson Stock Farms and the LSF prefix are well known throughout the Red Angus breed as well as the entire beef industry. The cattle bred by LSF are known for their low birth, growth, carcass and maternal characteristics while maintaining some of the most eye appealing Red Angus in the breed throughout the years. LSF has appeared on the top 10 list of seedstock operations for both Beef Magazine and NCBA since 2015. This is the highest ranking for any Red Angus operation in the history of the breed.

Technology Advances

Ludvigson Stock Farms has always been on the cutting edge of technology. LSF was the very first beef customer for Trans Ova Genetics and has been an active customer since 1980. When beef carcass ultrasound was developed for commercial use, LSF was one of the first breeders to submit not only ultrasound carcass images on bulls but also all replacement females. As DNA profiles were included in EPD calculations, LSF was one of the first breeders to submit samples on all bulls offered for sale. After those first samples then LSF began submitting samples on all bulls and replacement females. In 2015, LSF installed their own Growsafe Feed Efficiency systems so that every bull and 2/3s of the replacement females were individually feed tested for efficiency.

LSF embraced the technologically advanced idea of cloning and "cloned" the first Red Angus bull, LSF Takeover 9943W in 2016. The next phase of technologically advanced ideas that LSF has developed and embraced is in the area of "Precision Breeding" through gene editing to turn Angus genetics red. LSF has always embraced technology in the early phases to provide cutting edge genetics to the breed and the beef industry.

New Beginnings

We are looking forward to writing the next chapter in our history and we hope many of you will be able to participate with us.

Our Cooperator Team is made up of some of the most progressive Red Angus breeders in the breed. Our collective cow herd is made up of a high percentage of females that all originated from the Ludvigson Stock Farms Elite Nucleus herd as well as Embryos from our Genetic Advancement Center. Our cooperator team is held to a high level of management and health including observations for foot and leg structure along with teat size and udder attachment. Not only are the females in the cow herd scored but we utilize Proprietary Leachman EPD's for Teat and Udder along with Claw and Angle for foot structure.

We personally are involved in helping our team make genetic decisions and

help members make mating decisions that ultimately end up in the genetics that we offer. In addition we also utilize a standard health protocol that all members follow so that we have a cohesive health program across all cow herds as well as the bulls offered in our sales.

We incorporate a high degree of communication and education in making our cooperator team one of the best in the country for any breed. Listed below is our team and we could not be more proud of all of these members and the genetic contribution they are making to the beef industry. If anyone has questions about joining our team please feel free to contact Ryan Ludvigson at (515)450-3124.

\$Profit® now laser-focused for 2023 and beyond!

**On December 12th, 2022, the \$Profit system
made its largest modification in history.**

This unprecedented change was driven by new technology, better data, and changing markets. The primary drivers of the changes were as follows:

Change #1. The system incorporated the Zoetis Cow Fertility EPD into \$Ranch® and \$Profit®. The Cow Fertility EPD predicts large differences in the calf crop percentage expected from a bull's daughters!

- The Zoetis Cow Fertility EPD was launched in May of 2021. It included data on over 160,000 dams with over 975,000 calving records. These dams have pedigree links to the entire 1.4 MM animal \$Profit database. This includes cowherd data from all of the \$Profit Partner herds listed below.
- After extensive investigation, we believe that this EPD is the single best predictor of a cow's lifetime productivity.
- Model analysis demonstrates that the number of calves produced in a cow's lifetime is DIRECTLY related to that female's probable annual calf crop percentage weaned.
- Higher Fertility EPD bulls produce daughters that will wean a higher average annual calf crop percentage weaned.
- These calf crop percentage differences drive HUGE differences in profitability.
- High Fertility EPD bulls will build cow herds with consistently better breed back, higher calf crop percentage weaned, less culling requirements, and reduced replacement rates.

These modifications have significantly changed the expected \$Ranch®, \$Feeder®, and \$Profit® for animals in the \$Profit® System database.

- Selection for \$RANCH® will build the most fertile and efficient cows.
- Selection for \$FEEDER® will build steers that efficiently gain and reach Prime marbling.
- Selection for \$PROFIT® will create the industry's leading cowherds for fertility, efficiency, marbling, and profitability.

Change #2. The \$Feeder® Index was adjusted to place more emphasis on reducing feed costs.

- Feed to Gain is more important than ever in the feedlot. Cattle with inefficient gains cannot efficiently reach higher carcass weights and higher marbling targets.

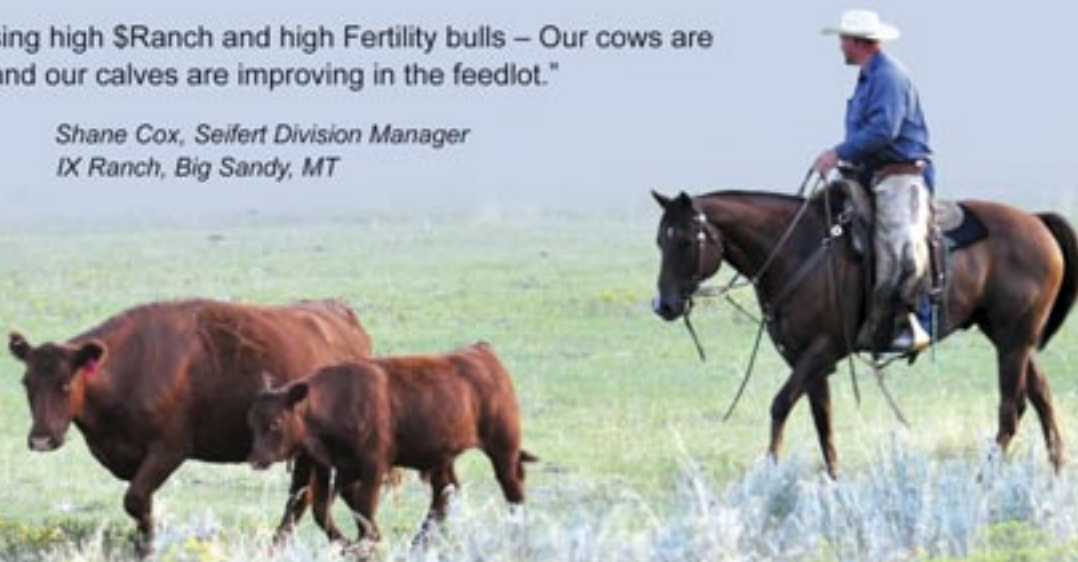

Change #3. 2022 markets showed a record Choice/Select spread and record Choice/Prime spread that make marbling more valuable than ever!

- In 2022, the difference between the Choice cutout value and the Prime cutout value was just over \$55 per cwt. This occurred despite record percentages of cattle grading Prime. On an 850-pound carcass, this is worth a shocking \$467 per head.
- Most Prime beef is still sold in the US domestic market. Increasingly, consumers are buying Prime beef in the retail case. The global export market for Prime is relatively un-tapped.

"It's all working..." Our cows bred up 94% and our 2-year-olds bred up 90% – all in a year with 3" less than normal rain. Plus, our calves weaned 30 pounds heavier.

We've been using high \$Ranch and high Fertility bulls – Our cows are getting better and our calves are improving in the feedlot."

*Shane Cox, Selfert Division Manager
IX Ranch, Big Sandy, MT*

OPTIMAL BEEF SOLUTIONS

How Would You Like to Benchmark Your Herd Against the Beef Industry?

Optimal Beef Solutions (OBS) is a program designed to utilize DNA samples from commercial cow calf herds to benchmark their genetic potential against the beef industry. OBS is a partnership in progress with Orion Beef Group, Zoetis and Ludvigson Stock Farms.

What Does a Producer Receive?

• **Parentage**

- Find out which bulls are the most influential in your herd
- Sires need to have DNA sample on record
- Dams could be utilized as replacements are kept in the herd

• **Genetic Benchmarks**

- Commercial EPD's and Indexes with Beef Industry Ranking on Sampled Individuals
- Graphical Analysis of Herd Ranking in the Beef Industry
- Natural and AI Sire Ranking on a Commercial Basis for Comparison

• **Herd Consulting**

- Analysis of Herd's Strengths and Weaknesses
- Evaluation of Natural Service Sires
- Suggestions for bull purchases
- Replacement heifer selection analysis

• **Marketing**

- Tangible Information for feedlot operators to consider in their purchasing decisions
- Maternal benchmarks to highlight the sale of replacement quality heifers
- Qualification for Valued Added Programs such as Top Dollar Angus

• **Denim Dollars**

- Receive bull purchasing credits for utilizing the program
- Leverage your bull buying dollars by utilizing cutting edge technology that will put you light years ahead of your neighbors!

Dial In Your Genetics To Beat the Competition!

Call (800)708-1530 to Get Started!

Contact us to Discuss How Optimal Beef Solutions Can Put You in the Driver's Seat! • All Inquiries Welcomed!

What a way to start the sale. This big-time herd bull is long, deep and thick. His genotype might be even better than his phenotype. Check out how he offers sleep all night low birth EPD with superb growth traits. You'll want to build an entire herd around him with his exceptional HPG, CE and ST. Little wonder he ranks so high for HBI and posts an incredible \$Ranch number. He will inject the carcass with top MB, GMI and \$Feeder. This guy combines looks, EPDs and \$Profit as well as any you are going to find.

I believe that you will appreciate the length and make up of this stud when you lay eyes on him. You and your bank account will also appreciate his progeny when they cross the scales with his elite performance that ranks in the single digits for WW and YW. He blows apart the antagonisms between marbling and muscling with his combination of top MB and REA EPDs as well as superb CW, FAT and YG. With all that, it is little wonder that he ranks so high for GridMaster Index as well.

Here comes another bull that is easy on the eyes, he is really nice. Even more impressive than him being eye candy is the fact that he makes the \$100/\$200 club. This is an animal that scores over \$100 \$Ranch and \$200 \$Feeder. In other words, one that you want to grid every steer and keep every heifer.

If you or your customers market on a grid, you had better be investing in bulls like this guy. His \$Feeder is one of the highest in the sale. Even if you market your calves at weaning it still behooves you to invest in high \$F bulls as order buyers have shown that they believe in \$Profit and will pay premiums to procure high \$F calves.

RedAngus.org

Red Angus Guide to EPDS and Indexes

ProS... Profitability and Sustainability is an all-purpose index that predicts average economic differences in all segments in the beef supply chain. This index is a combination of the breeding objectives modeled in the HerdBuilder and GridMaster selection indexes. In this index, replacement heifers are retained from within the herd and all remaining progeny are fed out to slaughter and sold on a quality-based grid. Traits included in this index include calving ease, growth, HPG, STAY, Mature Weight, Dry Matter Intake and carcass traits. The resulting index is expressed in dollars per head born (Index/High Value).

HB HerdBuilder is a maternal selection index that predicts the economic differences of animals for traits that are important from conception through weaning. Expressed as dollars per head born, HB is calculated based on the scenario that bulls are mated to heifers and cows, replacement heifers are retained and all remaining progeny are marketed at weaning. Traits included in the HB index include Calving Ease Direct, Calving Ease Maternal, Weaning Weight, Milk, Mature Weight, Heifer Pregnancy and Stayability (Index/High Value).

GM..... GridMaster is a selection index that predicts the average economic difference of non-replacement calves through the post-weaning phase of production. GM places selection pressure on growth, feedyard performance and carcass traits. Expressed as dollars per head born, GM is calculated based on the scenario that progeny are fed out to slaughter and marketed on a quality-based carcass grid. Traits included in GM include Average Daily Gain, Carcass Weight, Dry Matter Intake, Marbling, Back Fat and Rib Eye Area (Index/High Value).

CED Calving Ease Direct predicts differences in the percent of calves born unassisted out of 2-year-old dams. (Percent/High Value)

BW Birth Weight predicts differences in actual birth weight of progeny. (Pounds/Low Value)

WW Weaning Weight predicts differences in 205-day weaning weight. (Pounds/High Value)

YW Yearling Weight predicts differences in 365-day yearling weight. (Pounds/High Value)

ADG..... Average Daily Gain predicts differences in weight gain between 205 and 365 days of age. (Pounds/High Value)

DMI Dry Matter Intake predicts differences in daily feed intake as measured in a feedlot during the post-weaning period. (Pounds/Low Value)

MILK Milk predicts differences in weaning weight attributed to the milking ability of the animal's daughters. (Pounds/High Value)

ME Maintenance Energy predicts the difference in maintenance energy requirements. (Mcal per Month/Low Value)

HPG..... Heifer Pregnancy predicts differences in the percent of daughters who are able to conceive and calve at 2 years of age following exposure to breeding. (Percent/High Value)

CEM Calving Ease Maternal predicts differences in the percent of daughters who are able to calve unassisted as 2-year-old heifers. (Percent/High Value)

STAY..... Stayability predicts differences in the ability of an animals' retained daughters to remain productive in the herd – calve every year – through 6 years of age. (Percent/High Value)

MARB Marbling predicts differences in marbling score – amount of intramuscular fat measured at the 13th rib. (Marbling Score Units/High Value)

YG Yield Grade predicts differences in USDA Yield Grade, which is calculated using CW, REA and Fat. (Yield Grade Units/Low Value)

CW Carcass Weight predicts differences in actual hot carcass weight. (Pounds/High Value)

REA Ribeye Area predicts differences in square inches of ribeye area measured at the 13th rib. (Square Inches/High Value)

FAT Fat predicts differences in the depth of backfat measured between the 12th and 13th ribs. (Inches/Low Value)

RED ANGUS MARKETING PROGRAMS

How to Enroll in FCCP and AA

1. Contact the Red Angus value-added department at **940-477-4593** and complete a short supplier enrollment questionnaire over the phone. RAAA staff will ask general management, animal identification and breeding questions. If needed, the producer may be asked to supply additional documentation on breeding such as semen receipt, lease agreements or information on purchased females.
2. After all documentation is recorded, staff will ship the tags directly to the producer who must tag the calves before they leave the ranch of origin – birth, branding, preconditioning, weaning or before loading on the semi.
3. The producer will receive a customer enrollment agreement to fill out and return to RAAA with a copy of their calving records.
4. Staff will issue the USDA-approved Certificate of Compliance upon receiving the customer enrollment agreement and calving record.

● *Notes* ●

● *Notes* ●

● *Notes* ●

• Terms & Conditions •

The Red Angus Association Terms and Conditions will apply if the terms and conditions printed here are not applicable.

TERMS: Terms of the sale are check or cash. Every animal will be sold to the highest bidder. The right of property shall not pass until after complete settlement is made. All settlements will be made with the clerks of the sale immediately following the conclusion of the sale and before any cattle will be released from the sale facility or ranch.

BIDDING DISPUTES: The auctioneer will settle any disputes as to bids, and his decision on such matters shall be final.

RETAINED INTEREST: We are retaining a 1/2 interest in all bulls in the catalog. We are selling the remaining interest, full possession, and full salvage value on these bulls. We also retain a breeding interest for in-herd use only in all other bulls in the catalog. We reserve the right to collect semen at the convenience of the buyer.

SEMEN RIGHTS: Buyers receive semen rights proportional to the interest purchased. If you purchase a 1/2 interest then you are entitled to 1/2 of the semen collections at cost provided that you indicate you want semen prior to collection. We intend to collect some of the bulls in the sale and sample them in our herd. We will cooperate with the buyer in collection of the bull. We prefer to collect most bulls after the first season of use and we will contact the buyer when we intend to collect the bull at a time convenient for the buyer.

PURCHASER'S RISK: Each animal becomes the risk of the purchaser as soon as sold. Animals will be fed, watered and cared for at the purchaser's risk for one week after the sale. After that, there will be a per day feed cost added to the purchase price, payable before possession occurs.

ANNOUNCEMENTS: Changes of information contained in this catalog relating to the animals offered for the sale will be announced from the auction box and such announcements shall take precedence. Errors discovered in the catalog will be corrected by announcements at sale time and such corrections will take precedence over the printed matter in this catalog.

BREEDER'S GUARANTEE: All animals sold are guaranteed breeders by the sellers. Any animal that has not proven itself as a breeder within six months after date of sale, if in healthy condition, may be returned to seller at buyer's expense. The seller reserves the privilege of trying, for a period of six months, to prove the animal is a breeder. The seller, at his option, may either replace the animal with another of equal value or grant the buyer a credit for use on any cattle marketed by the seller in full settlement and transaction of ALL claims. Yearling bulls shall be guaranteed breeders for no more than 25 females. All complaints regarding breeding difficulties must be reported in writing by the buyer to the seller within the specified time above, and any animal returned must be free from disease and in good health and condition. All animals are guaranteed to be breeders, with the exception of: a) calves under twelve months of

age; or b) animals shown by Purchaser after sale (in case of animals shown after purchase the breeding guarantee, if any, shall be such as agreed upon between Seller and Buyer; or c) gross negligence or willful misconduct on the part of the Purchaser.

OPTIONS AND PRIVILEGES OF RETURN OR ADJUSTMENT:

1. All claims for adjustment or refund must be made in writing either within six month of the sale date or no later than six months after the animal reaches 18 months of age with the exception of claims involving defects or parentage.
2. If a female sold as "open" proves to be with calf, the Purchaser may return the animal to the ranch of the Seller prior to calving for a credit of the full purchase price or for another animal of equal value, whichever is acceptable to the Purchaser. It shall be the obligation of the Seller to bear any expense incurred for transportation.

FERTILITY: All bulls have been evaluated and are guaranteed to be breeders.

LIABILITY: Neither owners, sale managers, clerks nor anyone connected with the sale assumes responsibility, legal, or otherwise, for damages of any kind. Any person attending the sale does so at his own risk.

CONTRACT: The above terms and conditions shall constitute a contract between the buyer and seller of each animal sold.

IDENTIFICATION: Each animal carries a tamper proof EID that corresponds to a DNA sample that has been taken by LSF. The tag numbers on the cattle correspond with lot and ID number in this catalog.

CERTIFICATE OF REGISTRY: A certificate of registry and transfer will be provided on all bulls sold. Heifers selling for \$900 or above will receive a registry certificate. If buyers of heifers under \$900 desire a registration certificate, they can be purchased for \$100 added to the selling price.

IMPLIED WARRANTY: Except for those stated in the terms and conditions, there are no warranties, wither expressed or implied, as to merchantability or fitness for a particular purpose with respect to the cattle being sold in this auction. The warranties set forth in terms and conditions are in lieu of all other warranties, either expressed or implied and the remedies provided therein shall be the sole and exclusive remedy of the buyer, or any part claiming through buyer, for any breach of warranty or guarantee therein provided and all other obligations or liabilities.

HEALTH: All cattle will have official health certificates and are guaranteed for interstate delivery.
