What is EDPlan Insight?

EDPlan Insight is an intuitive technology platform designed to encourage and support a district-wide culture of data use, from the classroom teacher to the office of the Superintendent

Provides staff a 'one-stop' experience for accessing student-related data in real time.

The system enables district staff to ask complex questions about student performance, both individual and in aggregate, and get answers to those questions immediately.

EDPlan Insight is designed for expansion as K-12 data needs grow, and works with Student Information Systems, and district assessment systems.

1

What are the Benefits of EDPlan Insight?

- Enhanced performance monitoring/formative assessment
- Student and class focus on learning objectives
- Improved student outcomes
- Extensive reporting and analysis capabilities
- Streamlined district-wide assessment management
- Increased system security
