Statement on Public Charter School Enrollment Growth

*Public charter school enrollment in NC grew by 6.4%
last year, and 19.2% since before the pandemic*

Raleigh, N.C. – Enrollment data released by the N.C. Department of Public Instruction shows that parents continue to embrace options in public schooling.

Enrollment in public charter schools [grew](#) by 6.4% between 2021 and 2022, and by 19.2% between 2019 and 2022.

Lindalyn Kakadelis, Executive Director of the N.C. Coalition for Charter Schools, said:

"Public charter schools complement, rather than compete with, district schools. We're all part of the public school family.

"That charter schools saw yet another sizable increase in enrollment this year hammers home the fact that parents both want and deserve options in public schooling. The reality is children have a better chance of reaching their full potential in a school environment that best suits their unique gifts. Sometimes that's a district school, and sometimes that's a public charter school."
