Polk State College

Students can explore internships and employment opportunities through our Career Services Department. Through the online Career Resource Center or meeting with specialists on campus students can take assessments, explore careers, connect with experts, gain experience, and find resources. Many students choose to participate in the College Work Study program, which allows them to work up to 20-hours per week on campus. The College provides Career Coach and Handshake to assist students with employment opportunities off of campus. Students in most Associate of Science programs also complete a required internship arranged through the academic department.
