

Tech Employee of the Quarter

Brandon Minter

Electronic Technician I (ETI) Brandon Minter has been selected as the department's Technology Employee of the Quarter for his outstanding performance.

Over the last quarter ETI Brandon Minter has strived to further his knowledge in the electronics and radio communications field. When the Motorola radio project kicked off, Brandon asked to learn and help with the process of preparing the new radios. Brandon has stepped up by taking the lead on numerous projects for the City of Richmond Police Department, Fire Department and the Sheriff's Department.

There have been quite a few times when a customer comes in with an issue he not only fixed that issue but notices other issues that he fix's while they are there.

He takes the time in assuring that the customer is properly informed as to what he found and what was done.

Recently ETI Minter has taken the initiative to fix the broken chairs at the 911 call center. This has proven to be a huge cost savings to our department, especially when some of

the chairs were damaged so badly that the company would have recommended us to replace it.
