“Working here, we don’t
always get the end
result of helping. I
wanted to do more. I
became more
passionate about it and
wanted to start
mentoring on my own.

“I was able to see a
change in the attitude
of the girls, once they
see that you are
dedicated and
committed to them on
your own time and want
to improve their
situation. I offer a
listening ear, words of
encouragement and let
them know that I want
to see them succeed.”
