

GIS and Project Manager Roman Gibbons

For the past year, I have witnessed his incredible work ethic, his problem-solving skills, and his devotion to the 911 center operations. Roman has an infectious positive attitude and does not hesitate to assist other team members when they present an issue to him.

While initially hired to handle the workload of keeping CAD Maps updated, he has also jumped headfirst into Reporting and bringing CAD 9.3 scripts and SQL

queries into 9.4. Roman's interactions with customers, with both his timeliness of response and his aptitude of caring and understanding about their complaints, have set a new standard for the Technology team.

His positive attitude, dedication to the mission, and tireless work ethic have greatly benefitted not only DEC but all of Richmond, he is the embodiment of what a Public Servant should be.
