## PANEL DISCUSSION

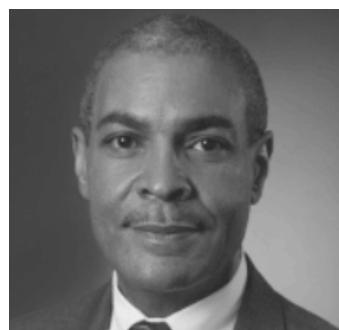

Three distinguished Fellows will be discussing the economic impact of the COVID recession — on large businesses that have taken on vast sums of debt to fund liquidity, small businesses that have found it difficult to access credit markets and government programs, consumers who have struggled in a period of rising unemployment and financial stress, and the economy as a whole. The panelists also will discuss recent and potential changes in bankruptcy laws that may provide relief in these circumstances, including the new Subchapter 5 and the proposed Subchapter 16 and Consumer Bankruptcy Reform Act.
