Unmanned Arizona (UAZ) Workshop

Location -

Gateway Community College
108 N. 40th Street
Integrated Education Building,
Copper Room 1302
Phoenix, AZ 85034

Aerospace Arizona Association is hosting a free one-day Drone workshop for Public Safety agencies, Government agencies and Commercial companies with the mission to promote drone education and safety. With the mission to build a safe and secure unmanned future for Arizona, this workshop will answer all questions including building a drone program, regulations, data management and selecting the right platform. The workshop will include nationally recognized subject matter experts and live drone demonstrations.

AEROSPACE
ARIZONA
LEADING THE AEROSPACE INDUSTRY IN ARIZONA

GOALS

- To make Arizona a leader in unmanned technology
- To help state, local & public safety agencies in building drone programs.
- To map out opportunities for economic development with unmanned technology
- To educate local communities on the benefits and risks of drone operations
- To connect local entrepreneurs with potential partners, investors, and customers
- To bring together stakeholders from the commercial, academic, and government arenas with the mission of building an unmanned future
- To organize the state's biggest annual unmanned summit
