

LMS recently completed the installation of the CLASS Panic Button system. This system operates through the use of strategically placed fixed and mobile panic buttons which, when pressed, immediately alert 911 and LMPD to an emergency, resulting in immediate police dispatch. LMS is the only synagogue in Montgomery County to be approved for the system - it is typically reserved only for schools.

We are in the final process of selecting a partner to complete our Independent Security Assessment. We hope to have the Assessment scheduled and (hopefully) completed by the end of January.

Finally, we have been in contact with LMPD and are in the process of scheduling a time for them to come in and provide guidance re: drill and evacuation procedures.
