Our unique student leaders work together in a cohort design that is problem-based, curiosity driven, and fully experiential. Through a rigorous and challenging daily schedule of classes, workshops, field studies, and special events, all of our global youth leaders are required to identify a societal or global issue that they want to actively endeavor to solve. Our students benefit from mentorship and workshops from some of the most creative and entrepreneurial minds locally, regionally, nationally, and globally. The Brandon Hall campus is located on a 27-acre historic nature preserve overlooking the Chattahoochee River.
