

# What's on Tap

WITH GLENDALE WATER SERVICES

Providing Reliability, Quality, and Value since 1915

Volume 1 ~ Issue 1 ~ April 2019

Welcome to the inaugural release of ***What's on Tap with Glendale Water Services***. We are excited to launch our new monthly brief highlighting who we are, what we do, and how we strive to serve you, the customer, in the best way we can. As customers of Glendale water, you entrust us to provide quality and reliable water/wastewater services 24-hours a day, every day and we take that job seriously.

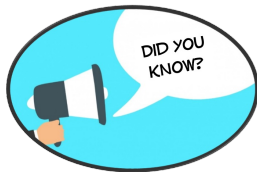

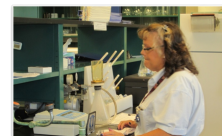

As a department, we produce over 16 BILLION gallons of water and distribute it to our customers through more than 1,000 miles of pipe each year! We also collect and treat over 6 billion gallons of wastewater annually. With over 1,700 miles of water and sewer lines that run through the city, did you know that if you laid them from end to end, it would be the equivalent of traveling from Glendale all the way to Chicago, IL?

Not only do we manage Glendale's water supply, but we also strive to provide excellent customer service, we promote conservation and sustainability, we implement new technologies for more effective and efficient water management, and we conduct long-term planning so the City of Glendale will always have the water it needs.

You can unsubscribe by clicking the link at the bottom any time, however, if you've ever been curious about what our department does, or if you're interested in learning more about the world of water, we hope you will stick around!

***The Glendale Water Services Department is getting SOCIAL. You can now follow us on Facebook, Twitter, Youtube, and coming soon, NextDoor. Click on the icons below to join us on social media today!***
