

Wall Mount Packaged Air Conditioners & Heat Pumps

Available for Immediate Delivery

Exterior Mounting
no valuable interior space is required

Features & Benefits:

- High Efficiency Compressor
- Lanced Fins Standard on all Evaporator & Condenser Coils maximize Heat Transfer
- High & Low Pressure Switches are Installed to Protect the Compressor in the event of a Loss of Air Flow across Coils
- Major Components are Accessible from Either Side
- Built-in Mounting Flanges
- Factory Installed Disconnect on All Units (including 460V)

Applications Include:

- | | | |
|-----------------------|------------------------------|---------------------------|
| • Relocatable Offices | • Modular Buildings | • Control Rooms |
| • Classrooms | • Telecommunication Shelters | • Commercial & Industrial |

Eubank® wall mount air conditioners are versatile problem solvers for a wide range of conditions and applications. Due to the high internal heat load in applications such as electronic equipment shelters, cooling is required even when outside temperatures drop below 60°F (15°C). Eubank air conditioners have the necessary controls and components for operation during these (less than 60°F [15°C]) temperatures. All models use the non-ozone depleting R-410A refrigerant.
