The Core Elements for Antibiotic Stewardship in Action

Effective antibiotic stewardship is an ongoing commitment – now is the time to augment the implementation of your facility’s ABS interventions. This new webinar series will review the core elements and feature stories from real hospitals who have achieved real results.

Series Description

Antibiotic stewardship (ABS) is the effort to measure antibiotic prescribing; to improve antibiotic prescribing by clinicians and use by patients so that antibiotics are only prescribed and used when needed; to minimize misdiagnoses or delayed diagnoses leading to underuse of antibiotics; and to ensure that the right drug, dose and duration are selected when an antibiotic is needed. The Centers for Disease Control and Prevention (CDC) originally released the Core Elements of Hospital Antibiotic Stewardship in 2014 to measure and improve how antibiotics are prescribed by clinicians and used by patients. Since then, hospitals across the country have successfully implemented the interventions outlined by the Core Elements.

Please join us for the opportunity to learn directly from your peers across the country in this multi-session series. The series will culminate with timely information from the CDC and antibiotic stewardship and medication safety subject matter experts. Additional session details coming soon.

Registration

Register for the entire series using the links below, or register for each set of core elements that interest you.

**Leadership and Accountability**
August 29, 2023 | 1 p.m. CT

**Pharmacy Expertise and Action**
September 19, 2023 | 12 p.m. CT

**Tracking, Reporting and Education**
October 24, 2023 | 1 p.m. CT

Note: Registration link coming soon for National Antibiotic Stewardship Updates occurring on November 9, 2023 12 p.m. CT
