

How can I... **CARE FOR COLORADO?**

PREVENT WILDFIRES!

*Drown Your Campfire **Dead Out!***

Hundreds of Colorado wildfires are caused by escaped campfires every year!

How Can YOU Help?

Never leave a fire unattended. A small breeze can cast embers and start a wildfire.

Burn the wood completely to ash. Stop feeding the fire and give it an hour or more to consume all the unburned fuel.

Drown your campfire with water before you leave your campsite. Stir your campfire and add more water. Repeat until it is cool to the touch.

Leave no trace. Restore the appearance of your campsite.

We can all do our part to **CARE FOR COLORADO** and Prevent Wildfires!

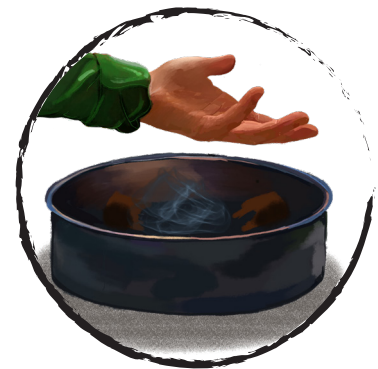

Drown

the ashes with lots of water.

Stir

Add more water and stir again.

Feel

ashes with your bare hand.
