## POWER CONTROLS, INC.

### Low Voltage

- Switchboards 400A-4000A 3PH 3W/4W (Stock Aluminum and Copper Bus) ⚡
- Metal Enclosed Switchgear
- Manual Transfer Switches 480/277V-600V (Fuseable & Breaker Type) ⚡
- Cinema Series Panels
- Breaker Enclosers (with or without mounting hardware / UL 508A) ⚡
- Mounting Hardware Kits (for switchboards & panelboards) ⚡
- Termination / Bus Tap Boxes
- Manual Bypass Cabinets - For Data Centers ⚡
- Cabinets & Cutout Boxes (UL 50)
- Temp Power Equipment ⚡
- Add to Existing

### Medium Voltage (5kV - 38kV)

- Metal Enclosed - Load Interrupter Switches 5kV-38kV (NEMA 1/3R/3R Gasketed / 3R Stainless) ⚡
- Metal Clad - Circuit Breaker
- Manual Transfer Switches 5kV-38kV (Fuseable & Breaker Type)
- Segregated Bus Way (UL 857)
- Termination / Bus Tap Boxes
- MCC Motor Control Center - modification and customization
- Temp Power Equipment ⚡
- Add to Existing

### Unit Substations (supplied with dry or oil filled transformers)

- Primary Unit Subs. (Primary side disconnect with or w/o transformer)
- Secondary Unit Subs. (secondary disc. with or w/o transformer & secondary distribution)
- Single Ended & Double Ended Unit Substations  
(close coupled, primary & secondary's cable, bus or bus duct connected)
- Skid Mounted Unit Substations  
(oil containment built into skid for oil filled transformers when applicable)
- Portable / Trailer Mounted
- Temp Power Equipment ⚡

NOTE: Distribution Dry-type Transformers over 600V (UL 1562)

### Custom Enclosures

- Nema 1, Nema 3R Non-Walk-in, NEMA 3R Walk-in, NEMA 3R Gasketed
- Metal Fabrication using Cold-Roll Steel, Galvanneal, 304/316 Stainless Steel, Aluminum, Structural Iron
- Powder Coat - Bake Dried Paint System

NOTE: other material & paint processes available upon request

### Services

- Add to Existing Measurements
- Field Evaluations

NOTE: other services may be available upon request

⚡ In Stock / Available for Quick Ship

## Markets Served

- Commercial
- Industrial
- Utility
- Oil & Gas
- Aerospace
- Water and Wastewater
- Data Centers / Networks
- Healthcare
- Food and Beverage
- Mining
- Entertainment
- Film Studios

## POWER CONTROLS INC.

POWER CONTROLS INC. was established in 1975 to provide the highest quality electrical power equipment, rapid response and second to none customer service. Today, PCI continues to embody these core values. Over the years we have become a trusted source of premium low and medium voltage switchgear, switchboards, bus way, enclosures, tap boxes, motor control centers, and substations.

Highly experienced electrical power equipment professionals execute every stage in the design, manufacturing, and testing of PCI equipment. Every piece of equipment we build is made in the USA at our factory in Commerce, CA.

Modern operations techniques coupled with our on-site design and engineering staff allow us to respond to your needs quickly and efficiently. We keep

the red tape to a minimum so that we can spend the maximum time exceeding our customers' needs. The experts at PCI are always available to answer questions, make suggestions, and make changes to meet the demands of your particular application promptly and skillfully.

At PCI customer service is ingrained in everything we do and every piece of electrical equipment we produce. We're able to provide a level of personalized service that you won't get from huge conglomerates. Our extended service contracts will give you peace of mind knowing that you can call on our service department 24/7 for any emergency.

When you add up all the advantages of PCI, it's easy to see why we're your best choice for electrical power equipment. Give us a call today!
