

What Elmerest students say: Great Basin Outdoor School at Lake Tahoe, Spring 2022

The BEST thing about Great Basin Outdoor School is: the fun activities, the nature activities and the cabin time, there are different ways to connect with people, learning about nature, going on the lake, spending time with my friends outside.

The MOST IMPORTANT new thing I learned is: that my friends care, taking care of the earth, about the constellations, don't waste food, how you should recycle more, invasive species are in Lake Tahoe, how to be a better friend, to take care of the environment/Mother Earth, all about nature and how fun it is with friends, everything has a purpose, how to save the environment and the water, how Lake Tahoe was formed.

The MOST EXCITING part of forest and wildlife ecology was: learning about beavers and birds, Mother Earth is the best, all of the cool rocks and interesting facts, water research, learning about the wild life, the trees and the chickadees, how Lake Tahoe was formed.

The MOST INTERESTING thing I learned about myself is: it's okay to be homesick, I love nature, how much I actually like the outdoors, I'm good at climbing rocks, I really like hiking and being outside, that I am not as shy as I thought, that I like learning about nature, I am good with other people, I learned how to keep my self safe.

GREAT BASIN OUTDOOR SCHOOL is: exciting, entertaining, amazing, interesting, educational, awesome, best camp ever, life changing.
