

The Arc
Mercer

Consumer Spotlight

Meet Bryan L. - "Consumer Spotlight" Recipient!

When we asked our team who they thought should be featured for the Family Supports "Consumer Spotlight," we were overwhelmingly told about Bryan!

Bryan is an active participant in our Virtual Day Program. He is known for his incredible empathy and consistent support of his peers. William Mouzon, Director of Day Program describes Bryan as *"The engine for our virtual participants. He participates in all topics, so programming is never dull. He supports the program with his energy for his peers and the staff."*

When asked about Bryan, Chris Hargrave, Director of Behavior Services told us, *"Since the start of the Virtual Day Program, Bryan has shown great enthusiasm by participating in the variety of activities that are provided each day. Whether it is art, a culinary activity, a virtual field trip, conversation about current events, or a game, Bryan does not*

hesitate to jump in and share his thoughts or make a contribution. He also encourages other individuals by asking them questions or communicating that he likes their ideas. When I conduct American Sign Language (ASL) sessions, Bryan shows his interest by asking questions, demonstrating signs that he remembers, and following along to songs signed in ASL."

Bryan is one of many gems that make up The Arc Mercer community. We love his passion for his peers and excitement for the program!

We are always looking to add to our fantastic community! If you or someone you know would be interested in our Day Programming or any other service we offer, please contact our Family Supports Department at familysupports@arcmercer.org or call us at (609) 406-0181, ext. 112.

"The engine for our virtual participants."

—William Mouzon, Director of Day Program

"Bryan has shown great enthusiasm by participating in the variety of activities that are provided each day."

—Chris Hargrave, Director of Behavior Services
