

2021-2025 State Cancer Plan Dissemination

**CALL
TO
ACTION!**

This document has been developed to help cancer control colleagues and others disseminate the State Cancer Plan to inform cancer control and prevention efforts in California. The plan includes evidence-based interventions intended to direct collective efforts toward reducing the cancer burden. Included is a summary page of the State Cancer Plan with clickable links to each chapter.

All cancer control stakeholders, including community members, health care providers, community-based organizations, and institutions have a role in implementing the plan. Disseminating the plan widely ensures progress is made towards strategies designed to reduce cancer mortality, increase screening, improve survivorship outcomes, and reduce cancer-related health disparities. We need the help of all of our partners to disseminate the State Cancer Plan. Please consider sharing this document or the direct link to the plan with your colleagues to further progress in cancer control and prevention in California.

CALIFORNIA'S COMPREHENSIVE CANCER CONTROL PLAN, 2021-2025

**Please help us track dissemination efforts! It's quick and easy:
Complete our [evaluation form](#) to enter your dissemination information.**

*For more information about CDOC, the State Cancer Plan, or assistance in dissemination,
please see our contact information below.*

California's Comprehensive Cancer Control Plan 2021-2025 Summary

ABOUT
THE STATE
CANCER PLAN

California's Comprehensive Cancer Control Plan, 2021-2025 (the state cancer plan) is a blueprint to reduce the cancer burden in the state. It is designed to provide guidance to individuals and organizations spanning health and social disciplines that have a role in impacting cancer control. It presents goals, objectives, and strategies for the five-year period of 2021-2025 that are productive and useful applications for cancer control. Other content in the plan includes a progress summary of the 2016-2020 cancer plan, efforts initiated by the California Dialogue on Cancer, emerging cancer trends, and cancer survivor stories. To download the plan, visit: <https://www.cdoonline.net/state-cancer-plan>.

Chapter 1: Cancer Burden in California

Chapter 2: Cancer Surveillance

Chapter 3: Emerging Cancer Trends

Chapter 4: California Cancer Centers & Programs

Chapter 5: Cancer-Related Health Disparities

Chapter 6: Equitable Access to Care

Chapter 7: Primary Prevention

Chapter 8: Early Detection & Screening

Chapter 9: Treatment & Survivorship

Chapter 10: Research

2021-2025 State Cancer Plan Dissemination

**EVERYONE
HAS
A ROLE!**

Spread the Word

Dear Colleagues,

We are excited to share the 2021-2025 State Cancer Plan developed by the California Dialogue on Cancer (CDOC), an excellent tool to inform cancer control and prevention efforts in California. It includes strategies that are productive and useful applications to use in your work. Whether you work in a cancer center, community-based organization, or are a concerned Californian who wants to contribute, everyone has a role. Below are several ways to get involved.

Everyone has a role!

- Share the plan with your colleagues and network.
- Join CDOC and collaborate on statewide projects and network with cancer control leaders in California.
- Share strategies you implement out of the plan.
- Share any dissemination efforts.
