

## ENDPOINT DATA PROTECTION

### Why Do You Need It?

**Growing Mobile Workforce.** More than ever before employees are using multiple devices for business purposes and creating sensitive corporate data. The endpoint solution set allows for easy scalability to protect and manage unlimited endpoint backups, regardless of location.

**Enable Collaboration & Increase Productivity.** File Sharing technology ensures data can be easily synchronized for anywhere, anytime, any device access and safely shared with internal and external teams to enhance collaboration and increase productivity.

**Meet Compliance & Regulatory Requirements.** Using integrated search & eDiscovery, businesses can significantly reduce their risk and become better aligned with legal, compliance and regulatory needs.

### Key Benefits Of Blair Endpoint Solutions

**Endpoint Backup and Recovery (laptops, desktops, tablets, smartphones).** Our technology helps you gain control of endpoint data with rapid, efficient, secure and transparent laptop and desktop protection, featuring source-side deduplication, opportunistic scheduling, and bandwidth throttling.

**Secure File Sharing & Collaboration.** File Sharing ensures sensitive business data remains secure in compliance with business requirements while increasing end user collaboration and productivity.

**Compliance & eDiscovery.** Information that resides on laptops and desktops is often overlooked, ignored, or difficult to capture for the purposes of data governance. Users benefit from a unified platform approach to make searching for eDiscovery and compliance information fast and cost-effective.

**Security Data Loss Prevention.** Advanced security features minimize the risk of critical business data being stolen or lost due to an unforeseen event. Remotely encrypt or wipe hard drive when device has been stolen.

**Data Analytics and Reporting.** Global reporting capabilities allow IT to quickly identify the status of their data protection environment, down to the individual desktops and laptops.

### Why Blair

- 24x7 support with tiered service level agreements leveraging Blair's 23 years of experience in backup
- Simplified operation including day-to-day backup and recovery as well as long term archiving and disaster recovery
- Reduced IT cost by eliminating the need to acquire and maintain multiple disparate infrastructure based backup systems

**Protection**

**Visibility**

**Productivity**

## Packages Tailored to Suit Your Specific Requirements

Feature	Feature Details	Endpoint Silver	Endpoint Gold	Endpoint Platinum
<b>Protection Features</b>	<ul style="list-style-type: none"> <li>Backup for Windows, Mac, and Linux (includes global deduplication and network throttling)</li> <li>Global, source-side deduplication</li> <li>Opportunistic scheduling - based on CPU utilization, power source, network capabilities,</li> </ul>	✓	✓	✓
<b>Security/Data Loss Prevention</b>	<ul style="list-style-type: none"> <li>Encryption (file-level, in-transit, at rest)</li> <li>Remote wipe and Geo-location</li> <li>Two-Factor authentication / Active Directory / SAML authentication / FIPS 140-2 certification</li> </ul>	✓	✓	✓
<b>End User Access Features</b>	<ul style="list-style-type: none"> <li>Smartphone / Tablet Access / End User Browse &amp; Recover via Web Console and Explorer Plug-</li> </ul>	✓	✓	✓
